DraftOrder

GET	<code>/admin/api/2021-04/draft_orders/{draft_order_id}.json</code>
------------	--

Completes a draft order.
 Using the DraftOrder resource, you can create a draft order and transition it to an order.

The following flows are supported:

- Create a draft order that calculates taxes and totals but accept payment from the customer outside of Shopify.
- Create a draft order and send an invoice to the customer.

<code>payment_pending</code>	<ul style="list-style-type: none"> • true: Sets payment pending to true. • false: Sets payment pending to false. default value.
